PROFILE

Finance researcher and educator specialising in sustainable finance, green finance, climate policy and regulation, and digital innovation/FinTech. Final-stage PhD candidate at Queen Mary University of London, with viva scheduled for 26 November 2026. Recipient of the IFABS Best PhD Paper Award (Second Place, 2026); Associate Fellow of the Higher Education Academy. Three years of finance teaching across trading, financial markets and corporate finance, and three years of professional experience in commercial banking and wealth management.

EDUCATION

PhD in Finance, Queen Mary University of London	2021–present
Viva scheduled: 26 November 2026. Fully Funded PhD Scholarship.	
MRes in Economics and Finance, Queen Mary University of London	2020–2021
MSc in Finance (with Honours), University of Arizona, USA	2014–2015
BSBA in Finance, University of Nebraska–Lincoln, USA	2011–2014
Included accounting and financial reporting coursework. Dean's List; Beta Gamma Sigma.	

PROFESSIONAL RECOGNITION AND QUALIFICATIONS

- Associate Fellow of the Higher Education Academy (AFHEA), awarded by Advance HE, July 2026.
- Passed CFA Level I — CFA Institute.

RESEARCH

Research interests: sustainable finance, green finance, climate finance, corporate finance, financial regulation, digital innovation and FinTech, ESG.

Job Market Paper — *When Sustainability Creates Value: Digital Innovation and Intangible Asset Complementarity*

Sole-authored. IFABS Best PhD Paper Award (Second Place), London, 2026. Draft available on SSRN and ResearchGate

Constructs a patent-based measure of digital innovation from USPTO/CPC data for U.S.-listed firms (2002–2022), showing that sustainability investment yields greater profitability and valuation gains when combined with high-quality digital innovation. A PSM-DID design around the California Global Warming Solutions Act provides causal evidence.

The Price of Green: Climate Regulation, Targeted Innovation, and Corporate Resource Reallocation
Sole-authored; draft available on ResearchGate

Uses the 2009 Regional Greenhouse Gas Initiative as a quasi-natural experiment (PSM-DID, U.S. public firms 2006–2013), showing that climate regulation improves environmental performance and green patenting while crowding out general R&D, particularly among financially constrained and power-sector firms.

The Informational Environment of Climate Transition Risk: Tone, Salience, and Green Innovation
Sole-authored; draft available on ResearchGate

Combines earnings-call climate measures, Wall Street Journal attention shocks and patent data for U.S. public firms (2002–2017), finding that higher transition risk predicts lower green patenting, consistent with the option value of waiting under policy uncertainty; supportive transition tone attenuates the effect.

CONFERENCE PRESENTATIONS

Ten conference presentations delivered in 2025–2026, plus an internal QMUL research seminar, including:

- Alliance for Research on Corporate Sustainability (ARCS), 18th Annual Research Conference, 2026
- International Finance and Banking Society (IFABS), London Conference, 2026
- World Finance Conference, 2026

- Research in Behavioral Finance Conference (RBFC), 2026
- Academy of Sustainable Finance, Accounting, Accountability & Governance (ASFAAG) Conference, 2026
- 3rd Workshop on Recent Trends and New Developments in Sustainable, Green and International Finance, 2026
- 16th Biennial APF International Conference on Macroeconomics and Finance, 2026
- International Conference in Finance, Accounting & Banking (ICFAB), 2026
- 6th Finance and Accounting Annual Symposium, 2026
- International Conference in Banking and Financial Studies (ICBFS), 2025

TEACHING EXPERIENCE

Teaching Assistant, School of Economics and Finance, Queen Mary University of London

Principal Teaching Assistant: Principles of Trading; Finance of Emerging Markets; International Financial Strategy.

Teaching Assistant: Principles of Finance; Foundations of Finance; Economics and Finance in Action; Statistical Methods in Economics.

- Delivered weekly campus-based seminars and tutorials to groups of approximately 20 students across undergraduate and postgraduate module cohorts of 60–100, including internationally diverse students with varied quantitative preparation.
- Designed seminars around constructive alignment: guided problem-solving on contemporary company cases rather than demonstration.
- Created digital learning materials — Excel templates and step-by-step scaffolds released one week in advance, and Python-based practice tasks in emerging-markets tutorials — supporting students less confident with technical terminology in English and adaptable to distance-learning delivery.
- Marked approximately 100 examination scripts across three finance modules, applying agreed assessment criteria and participating in the relevant assessment processes.
- Provided weekly office-hour support and developed common-questions resources to support quieter students and reduce recurring misunderstandings.

SUBJECT EXPERTISE AND TEACHING CAPABILITY

- **Trading and financial markets:** market microstructure, order types and execution, portfolio construction, risk and return, CAPM, option pricing and volatility, performance evaluation.
- **Corporate and international financial management:** NPV and IRR capital budgeting, cost of capital, risk-adjusted discount rates, firm valuation, international financial strategy, hedging, country and currency risk.
- **Sustainable and green finance:** climate risk and disclosure, ESG information, green innovation, and the regulation of sustainable finance, grounded in my research programme.
- **Quantitative methods:** statistical methods for economics and finance; applied empirical work in Stata, R, Python and Excel.
- **Basic accounting and financial reporting:** financial statement interpretation, supported by undergraduate accounting coursework, CFA Level I and Compustat use in research.

PROFESSIONAL EXPERIENCE

Wealth Manager / Customer Manager, Industrial Bank Co., China

2016–2019

- Worked with retail and corporate clients on investment products, portfolio allocation and risk profiling; professional experience supporting industry engagement and investment-management teaching.

SERVICE, AWARDS AND EXTERNAL ENGAGEMENT

- Organiser, 6th Annual PhD Workshop, School of Economics and Finance, QMUL, 2024.
- IFABS Best PhD Paper Award (Second Place), International Finance and Banking Society, London, 2026.
- Fully Funded PhD Scholarship, Queen Mary University of London, 2021–2026.

- University of Arizona Scholarship, 2014–2015.
- Benjamin F. Marshall Memorial Scholarship; Dean's List; Beta Gamma Sigma, University of Nebraska–Lincoln.

TECHNICAL SKILLS AND LANGUAGES

Software: Stata, R, Python, Excel, LaTeX. **Languages:** English (fluent), Mandarin Chinese (native).
